Registration Decision Statement[1] for 2,6-Diisopropylnaphthalene

Health Canada's Pest Management Regulatory Agency (PMRA), under the authority of the *Pest Control Products Act* and Regulations, is granting full registration for the sale and use of Amplify Technical and Aceto Amplify II, containing the technical grade active ingredient 2,6-diisopropylnaphthalene, to be used as a sprout inhibitor for potatoes in storage.

This decision is consistent with the Proposed Registration Decision PRD2018-05, *2,6-diisopropylnaphthalene and Aceto Amplify II,* which contains a detailed evaluation of the information submitted in support of this registration. The evaluation found that, under the approved conditions of use, the products have value and do not present an unacceptable risk to human health or the environment. The PMRA received no comments on PRD2018-05, *2,6-diisopropylnaphthalene and Aceto Amplify II*.

Other Information

The relevant test data on which the decision is based (as referenced in PRD2018-05, *2,6-diisopropylnaphthalene and Aceto Amplify II)* are available for public inspection, upon application, in the PMRA's Reading Room (located in Ottawa). For more information, please contact the PMRA's Pest Management Information Service by phone (1-800-267-6315) or by e-mail (hc.pmra.info-arla.sc@canada.ca).

Any person may file a notice of objection[2] regarding this registration decision within 60 days from the date of publication of this Registration Decision. For more information regarding the basis for objecting (which must be based on scientific grounds), please refer to the Pesticides section of Canada.ca (Request a Reconsideration of Decision) or contact the PMRA's Pest Management Information Service.
